

PRESS RELEASE

105 Consulting partners with Science Warehouse to offer comprehensive procurement package

United Kingdom – August 24, 2011 – 105 Consulting the leading procurement and supplier management consultancy has teamed up with Leeds-based Science Warehouse, one of the fastest growing companies in the e-business sector, in response to increased demand from the market for a truly joined up procurement offering. 105 Consulting focus on reducing costs and supply-side risk, building procurement and supply chain capability, and increasing the effectiveness of relationships with suppliers.

The partnership will align 105 Consulting’s strategic insight with Science Warehouse’s technology platform to deliver enhanced supplier relationship management. Customers will benefit from a full end-to-end offering to drive improvements in managing cost, risk and performance.

Iain Stewart, director, 105 Consulting Limited, said: “We are delighted to announce a strategic collaboration with Science Warehouse, an established and respected provider of e-procurement and catalogue solutions. Partnering with Science Warehouse is entirely logical – we are combining their successful experience in installing and managing easy-to-use software on clients’ existing platforms, with our expertise in driving benefits from procurement, using facts and data to develop and deliver compelling sourcing strategies.”

“The 105 Consulting partnership with Science Warehouse means that we are able to offer clients a comprehensive procurement consultancy and technology package to deliver deep insight into their processes and improve performance and capability across the organisation.”

Steve Kerridge, managing director of Science Warehouse, said: “We’re very excited to be working with 105 Consulting; what has impressed us is that the business is made up of procurement professionals with hands on experience of running

purchasing departments. They have the expertise and passion to identify and address a wide range of real-life customer requirements and deliver benefits quickly.

Science Warehouse's responsive and tailored e-procurement solutions are used by many leading organisations around the world to deliver procurement control and drive cost savings. Science Warehouse intelligently hosts 5,000,000 products across all purchasing categories and connects buyers with over 15,000 suppliers for electronic trading.
